

## **Command & Battlegroup Record Sheets**

Maintaining good records of your Battlegroups, their Fractions and Pickets is necessary for a good campaign. In this way, the player will have all the information required to make decisions about the forces at their disposal and be able to accurately conduct the campaign in hand.

The Record sheets here can be copied as required so that one is provided for every Command, Battlegroup, Fraction, Picket, Aircraft squadron and Partisan cell. They can be replicated on a computer screen if required.

The preparation for the campaign will reveal most of the information needed to populate these forms.

It is, perhaps, wise to complete these forms in soft pencil and have an eraser to hand so that changes can be made as the campaign progresses.

The rating of the Senior Commands is also required as part of this necessity as these are the Officers representing the player on the campaign map. The decisions they make are vital for the task in hand and so a record of their character traits is also required to aide the player set up the options and final decisions that these "Paper Generals" will make.

Ratings vary from Below Average to Average whilst the Character Traits are listed in **Section 8**. Fractions have the option of being commanded by an SO or a CO. In either case, only one set of ratings need to be recorded.

Note that Supply Stockpile limits differ from Battlegroups to Fractions.

Note that the "Map Board Attitude" of a force refers to **Present, Deployed** etc (as in **Section 15.3**) whereas "Attitude" could be **Active, Rest, Rationed** (see Section 20).

**Order Types** are listed in **Section 10**.

Whilst naval vessel data is recorded as part of the FYOW rules, an Aircraft Battlegroup Record Sheet is included here.
